The travel allowance will be the same as for the UK institution at which the student is enrolled.

3. TUITION FEES

Home Fees apply and vary from university to university, although the majority of institutions do charge the relevant Home Fee Rate (see below).

However, there are some courses which also attract an additional grant from HEFCE and the fees will be greater than detailed above. In these cases, we will fund the additional HEFCE funding for these courses.

We will limit fees to the Home Fee where an institution does not receive HEFCE funding and/or charges the overseas fee. Examples of such instances include but are not limited to Cambridge University, Imperial College, London and certain independent institutions and students should refer to the relevant section of the Guide to Higher Education Awards for Dependent Students for further information.

Students who commenced study prior to 2017	£9,000
Students who commence a new course in 2017	£9,250

PLEASE NOTE: It was advised that it was likely that the tuition fees for students who commence in 2018, or who commenced in 2017 and are continuing, would be £9,500 for 2018 and will rise annually by UK RPI thereafter. However, we believe the fees will be frozen at £9,250 for the academic year 2018 for both new and continuing students, but please note that fees may still increase by RPI in future years.

4. CALCULATING THE ASSET CONTRIBUTION

In addition to personal income and company profit, we will assess the parental contribution by reference to capital resources of every kind. Where total capital assets exceed £100,000, an additional contribution calculated on the following rates will be incurred.

Students commencing a new course in 2014 or after	2.1%
Student who commenced study prior to 2014	1.65%
